

X-pert Line

Healthy pallet strapping

Secure load units ergonomic,
easy and efficient

The Problem

Sick leave

5 days of sick leave per employee per year in every company in average, just caused by **back pain**.

Lack of motivation

Working in a **bent position** is stressful and painful for employees.

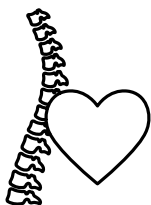

Time spent

Most of all companies need **two minutes** for the strapping process, ErgoPack does it in 40 seconds.

The Solution

ergonomic

No bending, low risk of injury,
prevent back problems!

Enthuse your employees,
they will be thankful.

easy

Simple operation, quick
training of your employees
and suddenly strapping is fun.

efficient

67% faster pallet strapping
ensures more
efficient workflows.

The ErgoPack

The original

Roll the **ErgoPack** in front of the pallet. The ChainLance pulls the **strap** through under the pallet.

Up again on the rear side and over the pallet into the hand of the operator. The **ChainLance** retracts.

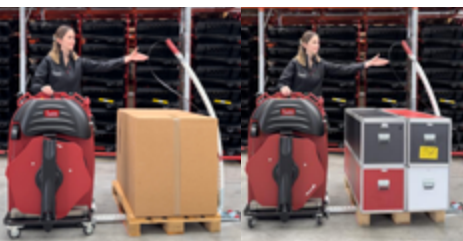

The **strap lifter** brings the 2nd strap end. The **sealing head** welds the strap securely.

Application Areas

- Pharmaceuticals
- Packaging
- 3PL
- Manufacturing Industry
- Automotive Industry
- Military
